One of the runs that we took on Challenger we took on skier's left. And to the best of my recollection, all of the runs we skied on Challenger that day were accessed from the left as you unload the chairlift. Q. Okay. A. But beyond that, I can't recall with specificity. Q. So on your left as you're coming up the chairlift? A. Yes. Q. Okay. A. Looker's left. Q. Yeah. So look at where is that? Well, let's start with Exhibit 16. Can you turn to Exhibit 16? A. (Witness Complies.) Q. You have Exhibit 16 in front of you? A. I do. Q. It looks like there might be part of a bull wheel. I can't tell from this photo. Q. Okay. Please look at Exhibit 20. A. (Witness complies.) Q. Do you recognize what's shown in Exhibit 20? A. Another ski run, though I couldn't name it just from this photo alone. Q. Okay. Is what is shown in Exhibit 20 the area you and Mr. Meyer's skied on each of your runs down Challenger on December 11, 2015? A. It depends on where it is in relation to the lift. If it's to the looker's left of the lift toward the very top, this could be what we had skied. Q. Okay. So just off to the left as you're coming up near the top of the chairlift, correct? A. Yes. Q. And so the you said each of the times you skied with Mr. Meyer off the Challenger

We'll take a break pretty soon and then we'll get one, okay? A. Okay. Q. Look at Exhibit 25. Do you recognize what's shown in Exhibit 25? A. This looks like the area immediately uphill like it was let me start over. It looks like it was taken by someone who is immediately uphill of where John's accident took place. Q. Okay. And did you ski anything any of the areas shown in Exhibit 25 on either of the runs before Mr. Meyer was injured? A. I can't recall with certainty. Q. Okay. Do you remember anything else about your first run on Challenger? A. There were definitely some rocks prior to the run in which John wrecked on the cat track. At some point the open area became closed, but neither John nor I saw signs indicating it was closed. Q. How did you know it became closed? A. There was a ski patroller below us waving his poles, getting our attention and obviously wanting to speak with us. So after he started flagging our attention, someone on the ski lift yelled "run." But I skied down to him. John also skied down to him and he said "That area's closed." Q. Look at Exhibit 22, please. A. Okay. Q. Do you recognize what's shown in Exhibit 22? A. I don't. Q. Well, look at exhibit — well, two things: First of all, if people from Big Sky were to testify that there are no cat tracks further up than the cat tracks shown in Exhibit 24, would that change your recollection? A. Well, recollection shouldn't be malleable like that, but it's possible that there are no other cat tracks. Q. Look back at Exhibit 16, please. A. (Witness Complies.) Q. Do you recall if you were skiing the area shown in Exhibit 16 when you skied into the closed area? A. It's possible, though I don't think it was quite so close to the ski lift itself. Q. Was the ski patroller standing on the cat track shown in Exhibit 16? A. I don't recall.

I was asked about specifics pretty frequently and I almost always said I didn't see the actual accident so I'm not the best source of information about what exactly led to him landing in a heap at the bottom of the slope. Q. Did you ever blame Big Sky when describing the cause of the accident? A. Not initially. Later as I came to think about it more and the lawsuit progressed, I did start thinking a little bit more critically about the role of a more than mile long cat track carved out of the middle of a mountain. But initially, I did not.

Tell me how you believe he has not fully recovered? A. His lungs still bother him sometimes. He feels like his cardiovascular capacity has diminished. Right now he still struggles with confidence for things, for sports that before were quite natural for him and came quite easily. Much of his erratic behavior, especially in the year or two immediately afterward, could be attributed to the ski accident. I didn't know him as well as his family members but his family has told me that in the years after John did act differently. Q. Has the erratic behavior subsided or gone away now? A. It's lessened. Outside he's probably closer to 5.10 minus. Q. Is that — well, had you ever climbed with him prior to the accident? A. I had not. Q. So do you know if his climbing has been impacted at all by this ski accident? A. I know that the plate in his arm has bothered him on and off as well as the plate in his collar bone in terms of impacting his stamina or his strength or perceived strength. Q. What other — A. Have you ever spoken with anyone in Dynafit after Mr. Meyer's accident regarding his ski bindings? A. No, not that I recall. Q. Have you ever spoken with a man named Drew Sanders? A. Doesn't ring any bells. Q. Have you ever spoken with a man named Scott Knight? A. Not that I recall.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	conclusion about it. Q. Are you aware of any facts to support the contention that Mr. Meyer's bindings somehow caused his accident? A. Yes. In the last two years maybe I've talked to other skiers who ski Dynafit bindings who have mentioned an unexpected prerelease of the binding. And I'm also aware of a blog post that was put up by Wildsnow referencing some upgrades that happened to that particular model of binding. John was in contact with the author of that post, but I don't recall the gist of it really. Q. Anything else? A. The question one more time? Q. Sure. Are you aware of any facts to support the contention that Mr. Meyer's bindings, the specific bindings he was using on the day of his accident, somehow caused the accident? A. Nothing beyond what I just stated. Q. Okay. And so to summarize what I think you just told me, there's a Wildsnow blog post,
